

CASEY HART

Casey is a dedicated team player who is passionate about semantic technology. A robust ontology can transform opaque, messy data into information that humans and computers can understand. Let me help.

EXPERIENCE

Ontologist Ford December 2024-Present

- Built a central data model to...
 - connect with industry standards (e.g. VSS, J1939)
 - facilitate data requests and retrievals for vehicle signals, and
 - scale for future information, use cases, and architectures.
- Developed SPARQL-driven ETL pipelines, reports, testing infrastructure, and API to support a variety of end user.

Ontologist Self-Employed July 2020-Present

- Consulted for clients in the retail, healthcare, and defense industries.
- Advised on building ontologies or on how to hire teams to develop ontologies.
- Built ontology models for existing data.
- Developed strategies for when (and when not!) to pursue semantic solutions.

Math Teacher Roseburg High March 2024-June 2024

- Taught algebra and calculus to juniors and seniors.

Ontologist Gro Intelligence July 2023-March 2024

- Created pipelines to allow analyst data entry to scale and integrate with the ontology.
- Developed a new ontological model that broke out of the constraints that the old “quintuple” model had run into.
- Built domain ontologies for climate and agriculture that connected with a universal upper ontology.

Ontologist Amazon September 2022-July 2023

- Managed domain ontologies for Amazon’s product catalogue.
- Developed a unifying OWL model to tie together data silos.
- Brought outside best practices into Amazon’s transitioning taxonomy job family.

Ontologist Olive AI October 2020-September 2022

- Built the RDF enterprise ontology from scratch.
- Educated and evangelized the graph with others in the organization.
- Generated documentation and blog entries to inform users and establish Olive as a thought leader in semantic technologies.

Ontologist Cycorp July 2017-October 2020

- Led independent project developing functional systems analysis, which ultimately became a drilling advisor product, landing Cycorp several contracts with Fortune 100

companies.

- Engineered ontologies for healthcare, fintech, oil and gas, and broad common sense.
- Developed efficient SPARQL and SQL queries to improve client efficiency of analyzing their data across their enterprise.
- Led and participated in pre-sales and sales efforts with medium and large (Fortune 5) companies in the health, energy, defense, and automotive industries, and then converting these into Proof of Value and long-term contracts.
- Overhauled internal marketing materials and efforts, saving Cycorp money from using outside consulting and directly improving our communication and sales pipeline.

Lecturer University of Wisconsin-Madison Fall 2011-July 2017

- Designed and taught dozens of courses in philosophy, logic, ethics, and communication.

Further experience and accomplishments, as well as references, available upon request.

EDUCATION

University of Wisconsin-Madison

Ph.D.	Philosophy	2017
-------	------------	------

University of Wyoming

M.A.	Philosophy	2011
------	------------	------

Pacific Lutheran University

B.A./B.S	Philosophy/Mathematics	2008
